

Occupational Therapist, Advance your skills in functional cognition to new levels!

Optimizing Functional Cognition and Executive Function: Assessment and Strategy Based Intervention

Date : September 30 - October 1 & 2, 2026

Place : Centre hospitalier Charles Perrens, Bordeaux, FRANCE

Presented in English by Joan Toglia PhD, OTR/L, FAOTA

Dr. Toglia has 40 years of experience in Occupational Therapy, working in acute, rehabilitation and outpatient settings with persons with cognitive impairments. Dr. Toglia is especially known for her work on the Multicontext Treatment Approach and the use of dynamic investigative assessment methods. She has presented lectures and workshops worldwide and is author of numerous publications. She has contributed extensively to the field of cognitive perceptual rehabilitation as a clinician, educator and researcher.

- **Day 1** : Part 1 Functional Cognition: Clinical analysis of Executive Function, Memory, Self-Awareness Performance Based Assessment
- **Day 2 & 3** : Part 2 Fundamentals of the Multicontext Approach based on the Dynamic Interactional Model of Cognition. The MC approach helps people generate and use cognitive strategies to manage, regulate, or control cognitive performance errors and cope with cognitive challenges across everyday activities.

NB: Workshop open to European occupational therapists, delivered in English with materials in English or translated into French.
